Web
DEVELOPER

TOM CONROY

UX
DESIGNER

Objective

To develop elegant and intuitive applications for web and mobile, utilizing powerful, modern technology stacks. To work within an organization where my passion for front-end engineering can be employed in the crafting of unique and engaging products for our end-users. To function in an environment which fosters creativity and values exploration, providing ample opportunities to learn & grow.

Education

B.S., New Media Interactive Development | Rochester Institute of Technology, Rochester, NY
Cum Laude, Fall 2014 | 3.55 GPA | Minor in Literature Studies

Experience

Front End Developer | Forbes, Jersey City, NJ

Member of the Product Development team at Forbes Magazine. Assumed a variety of different internal roles, but primarily focused on the development of a next-gen progressive web app experience for editorial content. Utilized a cutting-edge mobile centric tech stack consisting of ES6, React, Redux, Node/Express server side rendering, Docker, AWS, continuous integration. Focus on data-driven development through continuous release cycle and A/B testing.
April 2015 – Present

Web Development Intern | Magnani Caruso Dutton, Manhattan, NY

Utilized Laravel, jQuery, Backbone, Moustache.JS, Twitter Bootstrap in a team-centric AGILE environment. Developed both internal tooling and client-facing products. Clientele included Discover Financial and Samsung US.
June 2014 – September 2014

Web Applications Developer | R.I.T Department of Assessment, Research & Technological Services

Worked as a full-stack developer, maintaining domains & webapps used by students & faculty campus wide.
August 2013 – January 2015

Web Development Intern | Datto, Inc., Norwalk, CT

Member of the Front-End Engineering team, worked to standardize practices across front-end codebases. Modernized existing client-facing portals with a responsive framework.
August 2012 – November 2012
